Team 16: Youth Smoking and Drug Consumption Analysis

DATA-VIZ HACK-A-BIT 2026–2027

Team Member Name	Roll Number
Atchaya S	25BAD016

1. Week Contribution:

Explored the structure and variables of the selected Drug Consumption dataset and maintained the project files and initial dataset documentation in GitHub.

2. Work Done:

During Week 2, my individual work focused on explored the structure and variables of the selected Drug Consumption dataset and maintained the project files and initial dataset documentation in GitHub.

- Loaded and explored the selected Drug Consumption dataset to understand its overall structure.
- Reviewed the dataset dimensions, column names, data types and the meaning of the main demographic, personality and substance-consumption variables.
- Identified numerical and categorical variables and studied the difference between them.
- Explored basic descriptive information such as counts, minimum and maximum values, averages and category frequencies where applicable.
- Organised and maintained the Week 2 documentation/notebook and relevant dataset files in the Team 16 GitHub repository.

3. Topics Covered:

- Dataset dimensions and structure.
- Numerical and categorical data types.
- Basic descriptive statistics and frequency counts.
- Demographic variables, personality variables and substance-response variables.
- GitHub file organisation and updating the weekly project record.

4. Outcome of My Contribution:

The dataset structure and major variable groups became clearer, helping the team plan the cleaning and exploratory analysis stages. The Week 2 work was also recorded in the shared GitHub repository.

5. GitHub Repository:

Repository: https://github.com/atchayas-ai/DSV_Team_16_Youth_Smoking_Drug_Abuse

I helped manage and maintain the shared repository by keeping the relevant weekly documentation, notebooks, datasets and project materials organised. The exact files updated during each week are described in the Work Done section.
