WEEK 8 REPORT

Dashboard Construction & Visual Storytelling

Team 16: Youth Smoking and Drug Consumption Analysis

DATA-VIZ HACK-A-BIT 2026–2027

Team Member Name	Roll Number
Atchaya S	25BAD016

1. Week Contribution:

Reviewed and interpreted the final Power BI dashboard visuals, connected the statistical findings with the dashboard insights, and maintained the project's GitHub repository and final project files.

2. Work Done:

During Week 8, my individual work focused on reviewed and interpreted the final Power BI dashboard visuals, connected the statistical findings with the dashboard insights, and maintained the project's GitHub repository and final project files.

- Reviewed the final Power BI dashboard, which contains two pages: "Youth Drug Consumption Analysis" and "Youth Personality & Behavioural Analysis".
- Reviewed the first page, including summary cards for 1,885 individuals, 35 features, 6 age groups and 9 education levels; substance-response distributions; demographic comparisons; and substance ranking.
- Reviewed the age-group versus alcohol, gender versus alcohol, and gender-wise cannabis visuals, along with the age-group, gender and education slicers.
- Reviewed the second page, including the five personality-dimension summary cards, personality-trait comparison, Neuroticism versus Extraversion visual, and Neuroticism across age groups by gender.
- Helped interpret the displayed patterns carefully, recognising that the project is descriptive and does not establish cause-and-effect relationships.
- Maintained the GitHub repository by organising the weekly reports, notebooks, raw and cleaned datasets, consolidated notebook, README and other project materials. The repository was used as the central place for the team's project files.

3. Topics Covered:

- Dashboard interpretation and visual storytelling.
- Demographic and substance-consumption comparisons.
- Personality-trait visualisation and interpretation.
- Interactive dashboard filters and key insights.
- GitHub repository organisation and project-file maintenance.

4. Outcome of My Contribution:

The final dashboard brought the project's demographic, substance-consumption and personality analysis together in a visual format. Maintaining the GitHub repository helped keep the project documentation, datasets and notebooks organised for review and submission.

5. GitHub Repository:

Repository: https://github.com/atchayas-ai/DSV_Team_16_Youth_Smoking_Drug_Abuse

I helped manage and maintain the shared repository by keeping the relevant weekly documentation, notebooks, datasets and project materials organised. The exact files updated during each week are described in the Work Done section.
