WEEK 1 REPORT

Team Formation & Data Hunting

Team 16: Youth Smoking and Drug Consumption Analysis

DATA-VIZ HACK-A-BIT 2026–2027

Team Member Name	Roll Number
Atchaya S	25BAD016

1. Week Contribution:

Researched suitable statistical analysis and EDA techniques for the selected project, helped establish the team's GitHub repository, and organised the initial project workspace.

2. Work Done:

During Week 1, my individual work focused on researched suitable statistical analysis and EDA techniques for the selected project, helped establish the team's GitHub repository, and organised the initial project workspace.

- Participated in the initial project planning and understood the problem area of youth smoking and drug consumption.
- Researched statistical techniques that could be used in later project stages, including mean, median, mode, variance, standard deviation, skewness and kurtosis.
- Studied univariate analysis, bivariate analysis, correlation analysis and suitable visualisations such as histograms, boxplots and scatter plots.
- Helped set up and organise the Team 16 GitHub repository so that project files and later weekly work could be maintained in one place.
- Reviewed the project requirements and considered what kind of dataset and variables would be useful for the planned analysis.

3. Topics Covered:

- Descriptive statistics and measures of dispersion.
- Skewness and kurtosis for understanding distribution shape.
- Univariate and bivariate analysis.
- Correlation analysis and statistical visualisation.
- Basic GitHub repository organisation and version-based project file management.

4. Outcome of My Contribution:

The research provided a foundation for the statistical analysis planned in later weeks. The initial GitHub workspace also provided a shared location for organising project documentation, datasets and notebooks.

5. GitHub Repository:

Repository: https://github.com/atchayas-ai/DSV_Team_16_Youth_Smoking_Drug_Abuse

I helped manage and maintain the shared repository by keeping the relevant weekly documentation, notebooks, datasets and project materials organised. The exact files updated during each week are described in the Work Done section.
