Team 16: Youth Smoking and Drug Consumption Analysis

DATA-VIZ HACK-A-BIT 2026–2027

Team Member Name	Roll Number
Atchaya S	25BAD016

1. Week Contribution:

Worked on interpreting univariate and bivariate analysis and descriptive statistics, while maintaining the EDA notebook and supporting files in GitHub.

2. Work Done:

During Week 4, my individual work focused on worked on interpreting univariate and bivariate analysis and descriptive statistics, while maintaining the EDA notebook and supporting files in GitHub.

- Reviewed the distributions of selected demographic, personality and substance-consumption variables.
- Studied univariate analysis to understand the frequency and distribution of individual variables.
- Reviewed bivariate comparisons used to explore patterns between two variables, including demographic groups and substance-response categories.
- Interpreted descriptive statistics and visualisations to identify patterns that could be discussed in the project.
- Maintained the Week 4 EDA notebook and related documentation in the Team 16 GitHub repository.

3. Topics Covered:

- Univariate analysis using frequency distributions and charts.
- Bivariate analysis and comparison of two variables.
- Descriptive statistics for understanding data patterns.
- Interpretation of charts and statistical summaries.
- GitHub updates for the EDA notebook and weekly documentation.

4. Outcome of My Contribution:

The EDA stage helped identify patterns and comparisons worth exploring further. The notebook and supporting files were maintained in GitHub so the team could access the analysis as the project progressed.

5. GitHub Repository:

Repository: https://github.com/atchayas-ai/DSV_Team_16_Youth_Smoking_Drug_Abuse. I helped manage and maintain the shared repository by keeping the relevant weekly documentation, notebooks, datasets and project materials organised. The exact files updated during each week are described in the Work Done section.
